

10 Reasons A Practice Can Benefit From A DPA

The Digital Pulswave Analyzer can contribute in the following areas to your practice:

1. Provide to your practice the latest in non-invasive and affordable heart scanning without the exorbitant cost often associated with cardio technology.
2. Provide an additional technological tool in assessing and treating nervous system disorders through Heart Rate Variability screenings.
3. Provide additional and necessary patient treatment that can only be determined through this affordable and non-invasive cardiovascular screening.
4. Allow for greater patient compliance by providing re-screenings and instantly showing the results of your individualized and carefully prepared nutraceutical or pharmaceutical protocol.
5. Provide your asymptomatic patients and their families with peace of mind concerning their cardiovascular health.
6. Increase your ability to quickly determine your patient's needs to offer prevention as part of a cardiovascular wellness program.
7. Cultivate new patients and enlarge your practice by adding this revenue generator, which will quickly add to your bottom line.
8. Help others in your community learn about cardiovascular disease, a finally affordable and painless heart screening, your location and your practice.
9. Bring your practice a significant increase in income without costing you an excessive amount of additional time or expense.
10. Rejuvenate patient interest in your newly developed cardiovascular program, stimulating a resurgence of patients who have stopped visiting.
